Learning objectives:

- Identify Patients for Full-Arch Hybrid Treatment
- Understand how to successfully present Full-Arch Treatment to Patients
- Learn the process for completing Pre-op records for Hybrid Implant Cases
- Understand the CHROME Full-Arch Prosthetic Solution
- Learn about Full-Mouth Guided Surgeries with the amazing GuidedSMILE Full-Arch Stability Technology
- Identify the Clinical Steps required for Treatment Success and the Risk Factors of Hybrid Treatment

About the instructor:

Dr. Brent Boyse received his DDS degree from the University of the Pacific – Arthur A. Dugoni School of Dentistry and completed his residency in OMS at the University of Rochester Strong Memorial Hospital. He is a Diplomate of ABOMS and maintains a private practice in Mesa, Arizona. He has extensive experience treating Full-Arch immediate load patients in his practice and lectures around the world on this and other topics. Dr. Boyse was instrumental in developing the work-flow for Intraoral scanning and is the co-inventor and developer of Chrome GuidedSMILE Full-Arch therapy. He also enjoys leading a business skills academy and growing oral surgery practices throughout North America.

Dr. Brent Boyse DDS, OMS

Proudly hosted by **Shaw Lab Group**
at the new **Shaw GTA Education Center**

About Chrome GuidedSMILE:

CHROME GuidedSMILE, which works with all Implant systems, is an amazing new product that provides an anchored guide system, pre-planned bone reduction, and a beautiful anchored prosthesis. The CHROME system transfers all surgical and restorative information for the final prosthetic conversion phase. **Protec Dental is the exclusive designer of CHROME GuidedSMILE in Canada.** For more information visit: www.chromesmile.ca

CHROME benefits:

- **PLANNED SURGERY AND PROSTHETICS**
Bone reduction, Osteotomy Guidance, Abutment Placement, and Prosthetics
- **NO MORE BLIND DRILLING**
CHROME GuidedSMILE allows visualization of the drill pattern as implants enter the bone
- **NO BINDING AND BENDING OF ACRYLIC CHROME**
Metal Fixation Base is created utilizing Digital SLM Technology
- **NO MORE LENGTHY CONVERSIONS**
GuidedSMILE conversion process is efficient and accurate
